Professional Experience:

Travelers Inc, Hartford, CT

Senior Database Programmer

September, 2008 – Present

- Database developer using MS Access 2003 and 2010.
- Developed database systems for different organization in the Travelers Company.
- Some of the systems integrate Excel spreadsheets, Word templates, as well as importing and exporting report as Excel spreadsheets, Word documents and Adobe PDF's.
- All systems were built using VBA coding.
- These are turnkey system when completed.
- Saved one department 2.5 million dollars and other areas saved them time and resources.

PCDEVNET, Hartford, CT August, 2003 – 2008

- Worked in Java, XML, JavaScript, CCS (cascade style sheets) and Macromedia Flash, as well as connect database(s) to web sites.
- In the database work, I use Microsoft Access, Crystal Reports and SQL Server databases.
- Wrote stored procedures, views, and queries to display the data via VB.NET on the Web.

Mass Mutual INS., East Hartford, CT

Senior Database Developer

- Maintained and enhanced existing Microsoft Access database applications.
- Wrote VBA code to update or bring new functionality to the application interface to save time and money for the Benefits and Compensation department.

AIG, Farmington, CT
Senior Database Support Analyst

- Developed VBA code to create Access Reports and maintained legacy databases and supported Crystal Reports objects for AIG's end users in Connecticut and Florida.
- Made decisions related to the development of business reports and workflow procedures.
- Participated in the new design, creation, and maintenance of small to medium size databases.
- Modified and maintained existing applications in .Net and Access VBA, including testing and installation of these applications.
- Documented user requirements and translated them into proper system specifications.
- Tested, troubleshooted and performed related system refinements and improvements.
- Backed-up databases using SQL Server DTS, imaged hard drives and recovered data in various scenarios.

Hartford Hospital, Hartford, CT
Senior Distributed Programmer Analyst - Business System Analyst
September, 1997 – December, 2002

- Systems analysis and designed functions and subroutines, including the development of data maps to the specifications and end user requirements.
- Wrote Applications in Visual Basic 6 and Microsoft Access 97/2003 installed those programs and vendor products to support the HR Department, Finance/Billing, and Benefits area.
- Maintained Microsoft SQL Server databases, MS Access, Sybase, and MySQL as well as data dictionaries for a client/server database design.
- Created an Online Help System with Microsoft products and Adobe Acrobat to electronically distribute paperless documents to the end user which they could view and their Internet browser.
- Maintained existing Microsoft Access applications, reports and upgraded them as needed.
- I was the Team leader responsible for resolving issues and answering questions in the functionality of the application as well as creating detailed specifications to design the applications.
- Primary support person, providing analysis and design to and for the departments I was assigned too.
- There were special needs included report writing in Crystal Reports, creating development training materials for Microsoft Access, Microsoft Word, and Microsoft Excel.

Consulted at: GE Corporate in Fairfield, CT, Cigna Bloomfield, CT
Business System Analyst – Database Support
March, 1995 – August, 1997

- Provided team leadership in the implementation of projects assigned by the GE project manager to achieve the desired results as put forth by GE Corporate.
- Wrote a Time Card Application for the Nursing Department using Microsoft Access/VBA as well as converted Foxpro databases to Microsoft Access.
